

Closing the Door on Open Access

A Proven Methodology for Eliminating Open File Shares

What's the Problem?

Open access to file shares is consistently identified by IT professionals as a critical problem that is as difficult to answer as it is important to resolve.

STEALTHbits meets the challenge. Our efficient solution, proven at the world's largest organizations, provides a methodical and pragmatic approach that generates quick results addressing the very complex problem of Open Access.

Engineered for Success

Proven	Methodology perfected over years of implementation
Scalable	Architected to deploy efficiently at any
Targeted	Scoped for maximum efficiency
Intelligent	Able to identify and prioritize risk
Automated	Provides answers with reduced time and effort
Small Footprint	Minimal infrastructure for simple deployment

The Five Day Plan

It's time to decide that you're ready to eliminate open file shares. STEALTHbits will drive the process by utilizing a proven methodology to identify open resources and will provide a remediation plan within five days, regardless of organization size. In just a week you can have full insight into your open file shares.

STEALTHbits' intelligent and scalable data collection architecture eliminates the need for substantial infrastructure investment and lengthy project time commitments. You'll eliminate your top audit challenge by identifying and closing open shares whether it's across 100 servers or 10,000. By iterating through tasks and scoping data scans based on intelligence, STEALTHbits is uniquely able to drive real results and ultimately show high business value in very short order. Contact STEALTHbits today for a live demonstration of our solution for eliminating Open Access.

About STEALTHbits Technologies

STEALTHbits Technologies is a data security software company focused on protecting an organization's credentials and data. By removing inappropriate data access, enforcing security policy, and detecting advanced threats, we reduce security risk, fulfill compliance requirements and decrease operations expense.

Identify threats. Secure data. Reduce risk.
