

## Powerful & Immediate Web Security via the Cloud

WebTitan Cloud is a cloud based web filtering service allowing you monitor, control and protect your users and business when online. Requiring no on premise software or end user client software, set up is extraordinarily simple and quick. WebTitan Cloud is easy to set up, easy to manage and totally scalable. WebTitan Cloud allows you create policies to protect your organization from malware, phishing, and viruses, block access to unsuitable material such as pornography, hate speech or mature sites, and control access to non work related material in a way that suites you. Comprehensive reporting will let you see the browsing activity of your organization.
